Dear Sir/Madam,

I have been a subscriber to satellite radio for 6 months now and rarely listen to regular broadcast radio anymore. I pay for this priveledge and therefore get a wide variety of programming which includes XM Instant traffic and weather reports. Given that I travel frequently, this is a feature that is especially convenient. Satellite radio provides variety and quality that are not available elsewhere. Since I choose to pay for these services, it sould not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge you to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming I demand and deserve.

Sincerely,

Jim Robison
